

Regarding The NAB Petition to Stop XM broadcasting of local area news and weather/traffic updates. I believe there is a need for access to the airwaves for any law abiding entity. There is a real need for up to date broadcast of weather and traffic information. I ride a motorcycle, and current weather and traffic information is critical to the success and enjoyment of my trips. XM is the only access I have to local news and I would hate to see XM's and my own right to information sharing abused by the NAB.
